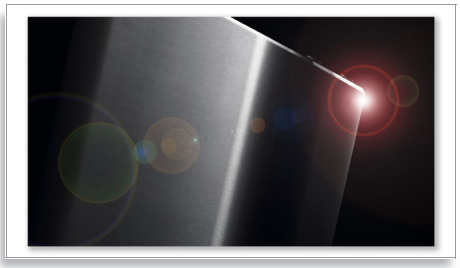
Highlights

SoundSphere

Bask in the glory and energy of music as SoundSphere gives you each note as the artist intended. Delivering clear and natural audio, SoundSphere creates a sound impression that is deeper and wider. The result is life-like audio that will make you believe the artists are performing in front of you. Each SoundSphere speaker features a tweeter that hangs above the speaker box. The tweeter is able to emit sound more clearly and in all directions. Precise audio crossover engineering and careful positioning of the woofer to embrace the tweeter ensures minimised interference and even more natural sound.

Aluminium speakers



Let nature bring you its best. Natural materials have proven themselves unbeatable as acoustic building components. Speakers made with aluminium are more rigid, forming a more ideal enclosure that naturally impedes vibrations, optimises soundwave propagation and produces sound with more fidelity. The result is gorgeous looking speakers that give you sound that stays true to the original recording.

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed music in true-to-life sound that will touch your soul and move your feet.

Free Internet radio stations

Streamium comes with thousands of free Internet radio stations. Now you can stay abreast of all kinds of music worldwide. Connect your Streamium to the Internet and listen to your favourite online programmes on your audio system without having to turn on your PC.

160 GB hard disk/2000 albums

The 160 GB hard disk provides a very large capacity for you to store your PC/MAC digital music files, easily holding up to 2000 music albums. Space saving, smart music collection management, easy access and all in one place.

EISA Award 2010-2011

European Compact System
This Streamium Wi-Fi audio, complete with SoundSphere speakers, will play DVD and DivX movie files and FLAC and WAV music files, and offers UPnP capability to stream MP3 music from a PC. It also plays files from its USB-connected additional 160 GB hard drive, while Ethernet or Wi-Fi connection allows you to have access to the Internet. The partnering aluminium SoundSphere speakers are driven from a 2 x 50 W Class D amplifier and combine an upward-firing bass/mid unit with a separate tweeter.
